BOVINE PREGNANCY TESTING INSTRUCTIONS

Preparation:

1. Confirm all cows to be tested are 28 days post-breeding and 90 days post-calving.
2. Collect needles, tubes and holders.
3. Number vials sequentially with a tube number beginning with 1.

Testing:

1. Collect a 2 cc blood sample beginning with tube number 1.
2. After the tube number, write cow identification number on the tube.
3. Use a new needle for each cow.

Packaging and Shipping:

1. Complete a sample submission form. Write the animal ID on the submission corresponding to each tube number.
2. If you are not shipping samples the same day refrigerate the samples overnight.
3. Package the samples for shipping with the submission form (no ice is necessary).
4. Ship to: Southeastern Animal Labs
1105 North Tennessee Street
Cartersville, GA 30120
